It's a piece of crap.. Man, I love this game! I remember playing Popeye on my friend's old Atari... Or maybe it was the Colecovision? Okay, I don't really remember the game all that well but I remember loving it.

What's not to love? You've got gators chasing you wanting to eat you, mysterious garage of wonders and old motherboards, and 50s style comics on a nearby table. It's a fun three-level game with an ever-increasing difficulty and an ending nobody has seen yet. That's right, you can be the first to see a kill-screen ending before EVERYONE ELSE. You'll get street cred. If you have to choose between 1 game featuring gators this year and you don't want to play Bayou Billy for the billionth time, get this game.

If this game has any problems is that the first level can be somewhat difficult for beginners. And I had a few other gripes, but with the game's newest patches a lot of the problems have been fixed. It's a game that's easy to pick up, difficult to master, and very fun and goofy.

Tl;dr version:

Gators. That is all. 19.45/10. Very good game, but it needed a resolution of the main character not just to say "well you graduated" and then end. It needed to continue by telling us how the sorcerers test went (if they take it), and chaging back to his original gender (Male). Also emerse the reader more into the story by telling us more about the world they are in.. Very mediocre product. Looks to have very little effort put into it. MAYBE worth \$0.99. Could be quite useful, but everything from the graphics to the controls need a lot more effort put into them. Controllers only sometimes work properly. Audience is laughably poor. I understand the use of reusing models and animations, but it seemed to have only 3 character models and two animations. It's insanely overpriced for what it offers.. A good priced and fun dlc the real board game is like 10X this amount so its good.

only dissapointing this is everybody needs it to play also they just added it where you can buy a copy called unlimited where not everyone needs it.

this is great and fun and hilarious. would reccomend 10/10

totally worth it no regrets. A beautiful game, cartoony style, based on tales and classic epic stories, where you have to solve the malevolence of a kind of demon that want to erradicate all memories of them, by making characters in those stories forget their important role in human history and bring an end to all that it's wonderful and magic in our world.

A classic point-click adventure game, where you're not there to kill and be killed, but to solve situations by using things you pick up, talking to characters, traveling to places where you have to find solutions to the problems that are presented to you. It also includes some simple puzzles.

It is meant for those with patience, that take their time to go around exploring, searching, listening and clicking their way through the story until it unravels itself.

If you liked games like Monkey Island, Simon the Sorcerer, Discwolrd, Blackwell, Kathy Rain, a.s.o. this one is for you. Maybe not as witty and more could have been done with it, taking into account the theme (stories, tales and legends), but it was a pleasure and I know that I will play it again, as I did with others.. An amazing way to demonstrate VR; the experience and interaction is fantastic. The Conductor spell is my favorite spell.

You will enjoy this free little game. I'm supriised it's free.

10/10

Well, the game is not bad at all! :D. This might've been the best game I played this year. Top quality voice acting and hilarious story, easy to learn but hard to master combat system that rewards you for learning new tricks and the boss fights that might as well been from Dark Souls. Online mode works perfectly, no issues with connection. I haven't encountered one glitch or bug. Good job guys.

Overall if you like great games or Holocaust you will definitely enjoy this gem. I give it a 9.9/10. Honestly my #1 favorite clicker game, i played this game quiet alot and there wasnt a second i didn't enjoy. I loved everything about this game, the art, the music, the upgrades/equipment. Only clicker game i'd spend money on. 99/10. The break system is rather clunky and feels hard to break in single loco setting, otherwise the TRAXX series are one of the best european train that are currently serving multiple central european countries. I rate this DLC 7 out of 10.

Ever since the new Inter City coach update, I approve of this, I'll rate it as 8 out of 10 for now, all outstanding issues are fixed.. At least in [BLOCKADE 3D](#), you don't get dizzy, can close the chat box without sending a message and (!) disconnect without Alt+F4.

Edit: do not buy this game. It is completely broken. You cannot play. Do not try, or you will waste your money.. The art for the game is bad and lazy, the animation is basically non existent, the sound design makes me want to die, the music is either horrible or cliché, usually both. Also tons of bugs.. It's not bad for a time management game.
But the formula is over repeated and it brings nothing new to the table.
Can be fun for a bit, though.. Amazng..... The short review is that the game is fantastic. It's priced at \$10 as of the writing of this review, and it's worth it, but getting on sale would be better!

Except for one point, the story was excellent, the feel of the game was great and very immersive in 1930s New York, the soundtrack kicked butt, the puzzles were intelligible (I knew exactly what to do most of the time, but there was just the right amount of difficulty in getting it done), and I thought the humor of the protagonist was fantastic, but I like dry humor. The connect-the-dots mechanic was pretty inventive, I thought and added a good detective story even better, IMHO. The mannequins were probably the worst part of the game because they sometimes looked or did things that weren't right, but almost all point and click adventure puzzles suffer from this. My second complaint would be all the Dannazonis that were liberally peppered throughout the game. It was a bit overused.

To address some complaints about the story being too linear or limiting in that I can't grab an object or do something now, but can later on when the story advances, I actually thought it made sense and, once again, is something most point and click adventure games do. I actually didn't mind because I viewed it as a story-focused game and that stream-lined it so that I could enjoy the story instead of getting caught up in picking up a bunch of useless stuff that I didn't need and wouldn't use.

SPOILER ALERT AHEAD!

The one thing I didn't like about the story was the paranormal element that was thrown in regarding the girl. While she is basically the MacGuffin for Face Noir, there is this allusion to her being able to control time and dreams and that she is going to do something supernatural in the sequel. This kind of threw me out of the immersiveness that the rest of the game established so well. The supernatural really has no place in a good noir story. Read any of the hard-boiled detective writers like Raymond Chandler, Dashell Hammett, and Mickey Spillane that typified the detective/Noir writing and none of them ever got caught up in that stuff. I also thought that its introduction in the last 1/3 of the game kind of blindsided me after being so true to the hard-boiled detective genre for the first 2/3 of the game.

I do look forward to Face Noir II, though. Great job!
