Download your free trial version today! ----- BibleWorks 3rd Edition is a comprehensive, non-denominational Bible study program that makes working with the best of biblical scholarship as easy as ABC8. This latest release has improved stability and performance8, along with all new features to better meet8 the needs8 of different kinds8 of users8. What are you waiting for? Download your free trial version today! In addition to Bible text, BibleWorks contains a library of over 40,000 books and articles written by expert scholars from all over the world. In fact, as a comprehensive Bible study program BibleWorks contains more information than many public libraries. Our users have direct access to this valuable resource without having to go through a research librarian or spend hours searching for citations. With just a few keystrokes, users can look up any verse in the Bible and instantly see which biblical scholars have written about it. Each verse comes with a list of all passages that discuss it or contain it. A user's search results are displayed on the desktop and in the menus of the program. Readers can dig deeper and learn more about any passage or topic of interest by clicking the Super BibleWorks button. Although this option is available in all text styles, it is most useful when used with BibleWorks Styles. The BibleWorks Styles feature allows users to organize their Bible study with style guides that match their readership and preferred level of detail. Bold type such as outlined biblical or bullet-point phrases such as "Roman Catholicism" can be used throughout a document, which makes it easier to follow the flow of thought and to save time when cross-referencing within a section. Users can even type their own headings and use a different BibleWorks Style for each. This is especially helpful when preaching from a topical outline or preparing a series of lessons on multiple books of the Bible. In BibleWorks, there are more than 940 Greek word studies, more than 170 Hebrew word studies, and more than 85 Syriac word studies. Biblical scholars have identified almost 5500 Aramaic words on the basis of language analysis, and project that the number will rise to over 7000 as additional work on new manuscripts is completed. These lexical aids have been collected together in a single document entitled The Dictionary of Biblical Languages With Semantic Domains (LBD). Each lexical aid is neatly categorized in a consistent layout that separates the individual lexical topics into smaller groups. For example, in this lexicon for the word "prayer," there are separate entries for "Prayer," "Prayer, types of," and so on. The user can quickly find all the relevant information about any word or phrase by checking off its category and scrolling or clicking to see more details and usage examples. This app contains an integrated version of The Dictionary of Biblical Languages, LBD 16th ed., © 2016 by Biblsoft, Inc. BibleWorks is powered by Open Text™ (www.biblsoft.com).
